

Coding Courses

(Age: 8+yrs to Teens-Adults)

Learn to code by building your favourite game!

Beginner Course: 10 hours (RM 600.00)

Advanced Course: 15 hours (RM 800.00)

Here's why learning to code is so important for children:

Coding drives innovation

From self-driving cars to robot-assisted surgery to social media, computer science is revolutionizing every aspect of our lives. Coding is a fundamental skill that children need to learn so they can lead this movement.

Coding allows kids to be creative

They can create projects that do super amazing things.

Coding builds confidence

It is incredibly empowering for children to be able to create projects and show them off to family and friends.

Coding is best learned early

Learning to code is similar to learning a second language. The earlier those children are exposed to fundamental topics like sequencing, loops, and conditionals, the more deeply they absorb these concepts.

Coding translates to success in other areas

Learning to program supports learning in other areas, like math, reading, and science.
